## PROFESSIONAL SUMMARY

Experienced Software Developer with **4+ years of development experience** and strong preference for javascript development and a proven track record completing full-stack cloud development. Proficient in React, NodeJs and AWS services with expertise in the healthcare IT industry.

## SKILLS

**Languages/Libraries/Frameworks:** JavaScript, React, Angular, Node.js, Express.js, Python, Django, HTML, CSS, SQL, RESTful API Development, CloudFormation, AWS CDK, TailwindCSS, Enzyme, Jest, noSQL

**Platforms:** AWS Services, Confluence, Jira, Jenkins, Git, Docker, Redis

**Standards:** X12 (835, 278, 837P/I/D), HIPAA

## CERTIFICATIONS

- **AWS Certified Database - Specialty** | Oct 2024
- **AWS Certified Security - Specialty** | Oct 2023
- **AWS Certified Solutions Architect - Associate** | May 2023
- **AWS Certified Developer - Associate** | Jan 2023
- **Fullstack Coding Bootcamp** | Oct 2019 - May 2020

## RELEVANT EXPERIENCE

### **Amazon Web Services**

*Cloud Application Developer*

**Oct 2022 – Current**

- **Reduced UI searching times** by designing and implementing a flexible document repository in Angular, cutting retrieval time from average 1 minute searching across multiple pages to 15 seconds on one search page with dynamic filters.
- **Ranked top 10 AWS Jam in 2023** for developing the Python and Node.js code, CloudFormation templates, and IAM policies for **Foundational DevOps & AI Customer Sentiment Showdown** jams.
- Developed micro frontend tooling and helped migrate legacy applications for the AWS Training & Certification team using AWS CDK and TypeScript.
- Facilitated multiple AWS bootcamp's for 20+ interns as the React and AWS CDK subject matter expert, leading to improvements in the bootcamp process and builder experience.

### **Glidian**

*Full Stack Developer*

**Feb 2022 - Oct 2022**

- Pitched and developed a global feedback component in React that helped customers quickly send feedback.
- Handled on-call responsibilities, addressing automation failures, metric alerts, and manual db changes for common workflows.
- Integrated a RESTful API connection for 3rd party healthcare clearinghouse API to Glidian's Express.js backend, enhancing data automation capabilities for authorizations.

### **Availity**

*Software Engineer II*

**Nov 2020 – Feb 2022**

- Successfully **migrated 10+ applications** from Java servlets and Angular SPA to a React micro frontend.
- Created wrapper for proprietary JS SDK for automated accessibility testing to meet Section 508 compliance and reduced manual testing done by developers and QA's.
- **Onboarded 5+ developers** to Availity's core services, teams, and development workflows while on SHIELD team.

*Software Engineer I*

**May 2020 – Nov 2020**

- Created and debugged **100+** Java and Javascript **edit(s)** in multiple custom healthcare processing engines that processed 1 billion transactions a month.
