Summary

As a self-driven software engineer with over 2 years of full-stack development experience, I possess a strong understanding of OOP and am highly proficient in JavaScript, Java, and Python. With a wealth of experience working with modern front-end frameworks such as React, Vue and Angular, I can effectively develop high-quality user interfaces. I'm comfortable creating robust backend APIs that are scalable and maintainable. My proficiency in working with databases such as MySQL, MS SQL, and NoSQL, and experience with task management and version control tools like Git, SVN, and Jira.

Skills

React • HTML5 CSS3 • Express.js • Node.js • AWS (EC2, Lambda, CloudFront, S3, API Gateway, Amplify) • SQL • Jest • Java • Jenkins • Python

Work Experience

Associate Cloud App Developer
Oct 2022 – present

AWS • Full-time

Remote

Technologies: React • Next.js

- Created UI with React for AWS' Application Modernization Assessment tool which increased turn around time for customer assessment results from days to instant.
- Architected and coded dockerized full-stack CRUD application for stock data for Proof of Concept on Engagement.
- Introduced and facilitated mob programming for faster development w/ team of 12 on an AWS CDK project.

Full-stack Developer
Mar 2022 – Oct 2022 • 8 mos

Glidian • Full-time

Remote

Technologies: Node.js • React • MySQL

- Integrated RESTFUL API for EDI 278 transaction with Nodejs in existing job server.
- Fixed UI bugs in React and retrieved data for key stakeholder requests via SQL queries.
- Performed on-call duty, including triaging bugs and fielding any requests from product-ops team.

Software Engineer II
Client Service Rep/Business Analyst
May 2020 – Mar 2022 • 1 yr 10 mos
Jul 2017 – May 2020 • 2 yr 10 mos

Availity • Full-time

Remote

Technologies: React • Java • JavaScript • Jest • Jenkins

- Spearheaded development for SDK wrapper that leveraged a proprietary accessibility analysis SDK w/ Javascript for use in 100+ Angular and React web apps.
- Worked with Edits team to create 20+ custom java edit logic within Availity's custom editing solution.
- Migrated microserve applications from monolith portal for Availity Customer Facing UI (Java servlets) to modern React UI.

Projects

Push Notifications w/ ChatGPT Integration
Oct 2022 – present

Technologies: Express (express.js) • React • AWS (Amazon Web Services)

PushEnhance is a SaaS Web Application that provides AI powered web push notification integration for websites.

You can schedule notifications, generate notifications text w/ ChatGPT, segment subscribers and more.

Certifications & Awards

Solutions Architect Associate - AWS — Jan 2023
Certificate of Completion - Full Stack Coding Bootcamp — May 2020
