Profile

I'm a web developer who enjoys solving tough problems and is looking for a position at an awesome company that holds similar values and offers opportunities for me to problem solve and continuously learn.

Skills

- React
- SQL
- Node
- Python
- Jest/Enzyme
- Git
- Bash
- Accessibility
- Agile Methodologies

EXPERIENCE

SOFTWARE ENGINEER I (ACCESSIBILITY)
AVAILITY LLC | 02/2021 - CURRENT
- Spearheaded integrating a custom accessibility javascript SDK into 100+ Angular, React, and Java Servlet web apps
- Corrected Accessibility issues for web apps (keyboard focus functionality aria attributes, contrast issues, etc),

SOFTWARE ENGINEER (FULLSTACK)
AVAILITY LLC | 09/2019 - 02/2021
- Created editing logic for custom java engine that processed over a million transactions a day in java and javascript (efficiency was important).
- Lead the development for the frontend for the above Edit Engine in ReactJS

PROJECTS

EDI API
Stack: Express/NodeJs, MongoDB, Javascript
Purpose: Created an API that routinely scrapes cms website for healthcare procedure codes CSV and provides it free for use withing a REST API

CSV-TO-ESF
Stack: Python
Purpose; Script to automate creating XML like files from CSV (saved 100+ hours at work)

SIMPGEN (IT'S NOT WHAT IT SOUNDS LIKE)
Stack: NodeJs, HTML, CSS, Markdown
Purpose: This is a simple static site generator i made for my blog. I didn't realize how bad the the name sounded when I first made it

CODUTORIAL
Stack: Django
Purpose: A Web app that takes in a GitHub URL and converts it into a new coding tutorial format

EDUCATION
